/KNJŽăŰYI-ă Bell

To do this craft, you will need:

1. Crayons or markers
2. A printer and paper to print out the drawing (thick paper works best)
3. Scissors and glue
4. Eventually blue wax/glassing paper

Here's how to do it:

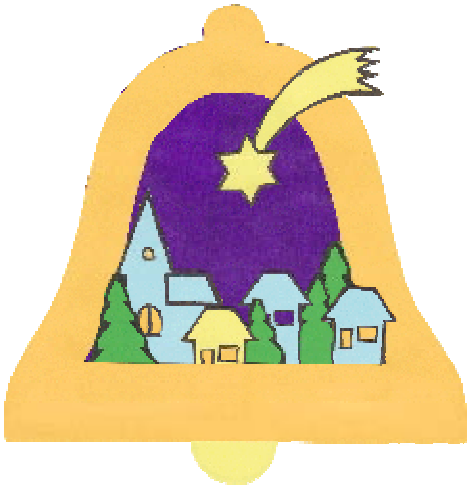
Download the PDF file below and print it out on thick paper.

Colour all the different parts of the bell and cut them out.

Put glue on the bottom flap of the bell and stick the decorations along the dashed line. Once everything is in place, glue the bottom flap to the bell.

Make sure everything fits in place perfectly.

You can then add the star and clapper.



The bell will be even nicer if you glue blue wax paper (or glassing paper) at the back of the bell.
