

A wreath for your door

Made of coloured paper flowers

You will need:

1. Thick white paper
2. Green and red paper
3. Small yellow pearls
4. Scissors and glue
5. Needle and thread

Instructions:

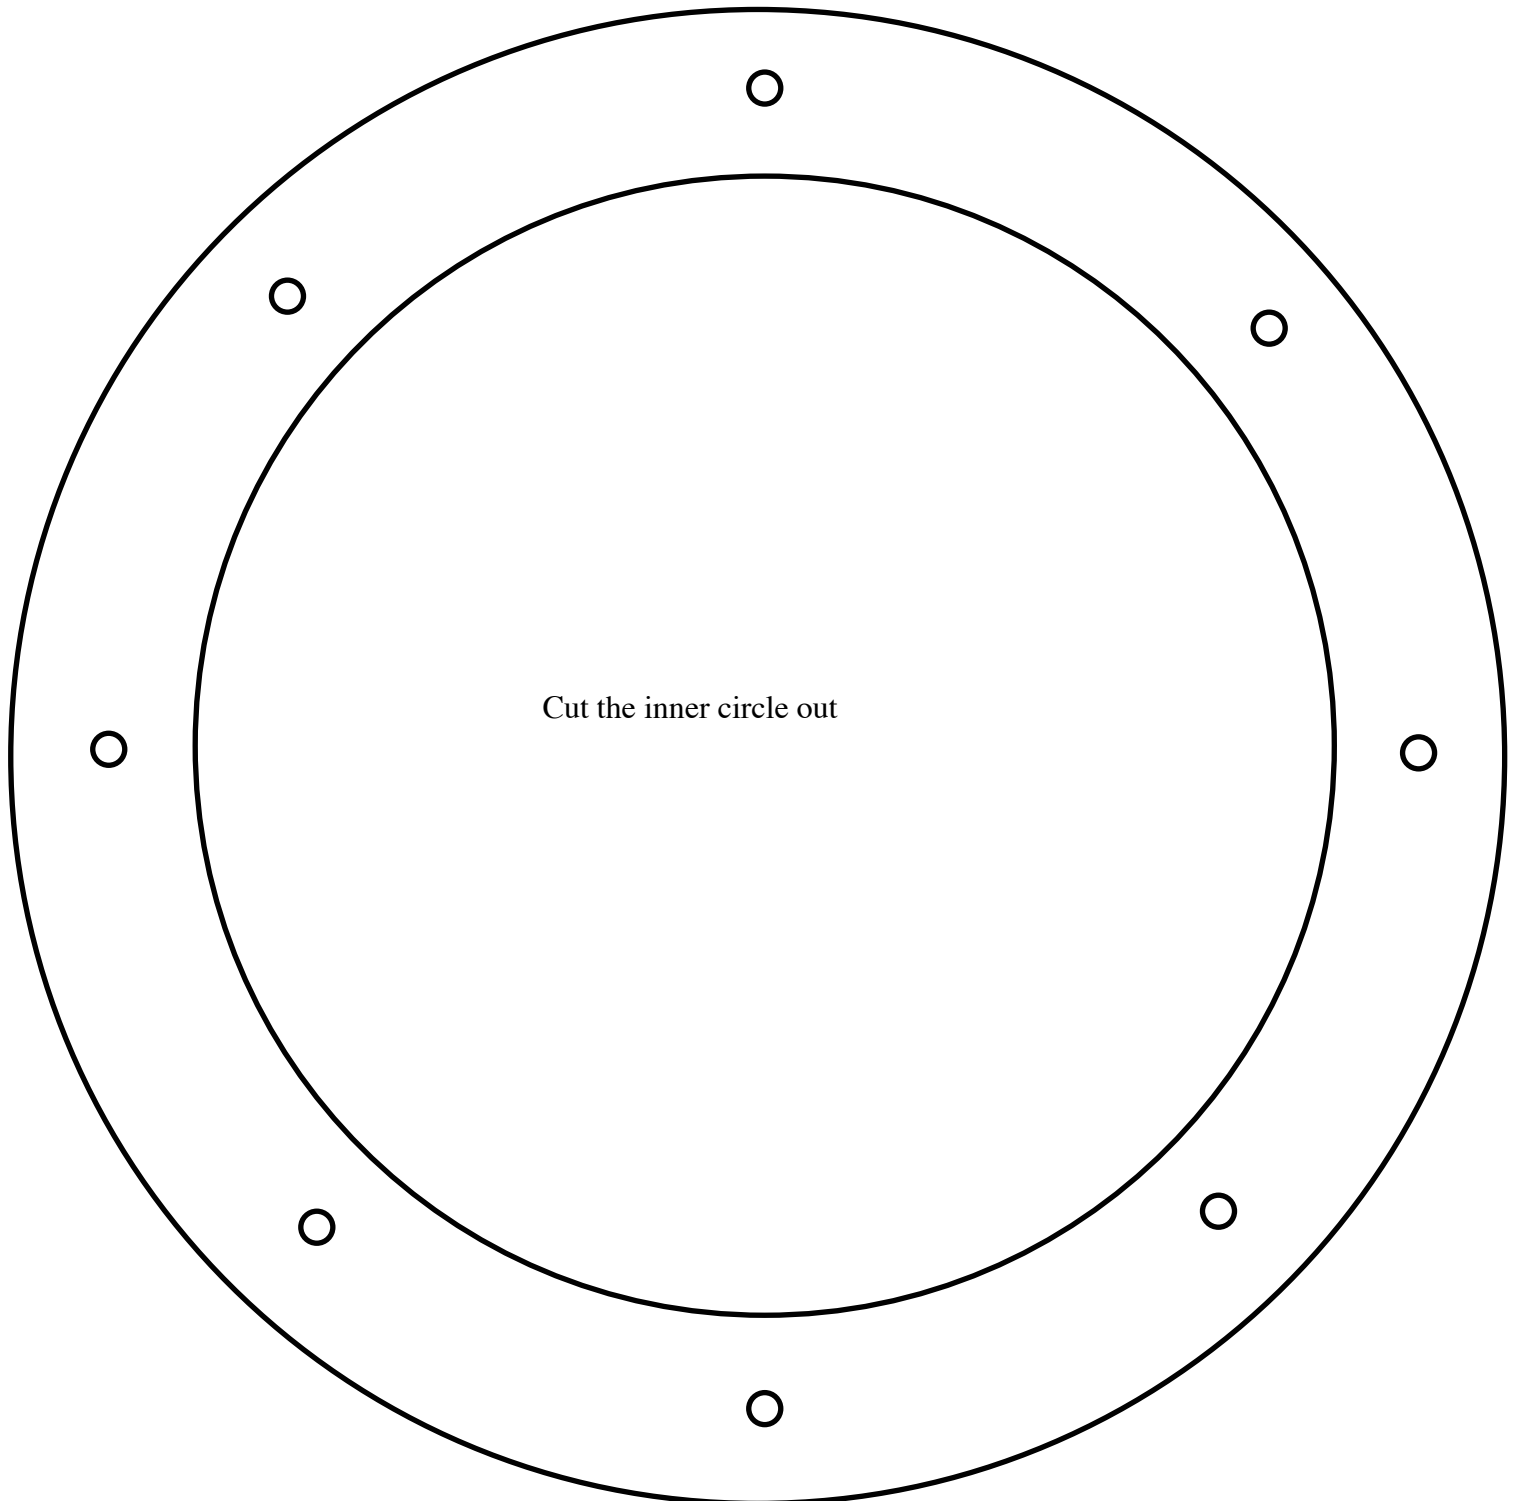

1. Download the PDF file below.
2. Print the circle shape on thick white paper and cut it out.
3. Print the big flower shape page on green paper and cut them out.
4. Print the medium and small size flower shape on red paper and cut them out.
5. Make a slight fold in the middle of each petal. You can do this easily by joining all petal points together and then folding each one by one.
6. Now glue a big green, a medium red and a small red flower together (see photo).
7. Use a thread and needle to stitch 4 yellow pearls. Make the thread go through the flower and the white paper ring.

If using a needle and thread is too difficult, you can ask for help from another family member or simply use strong glue for fastening everything together.

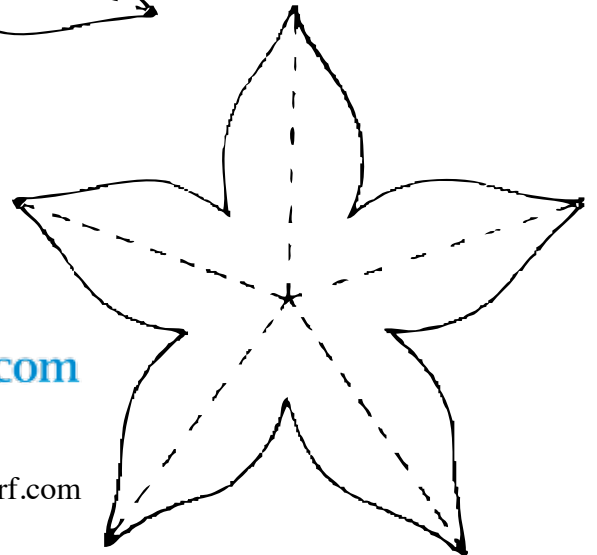

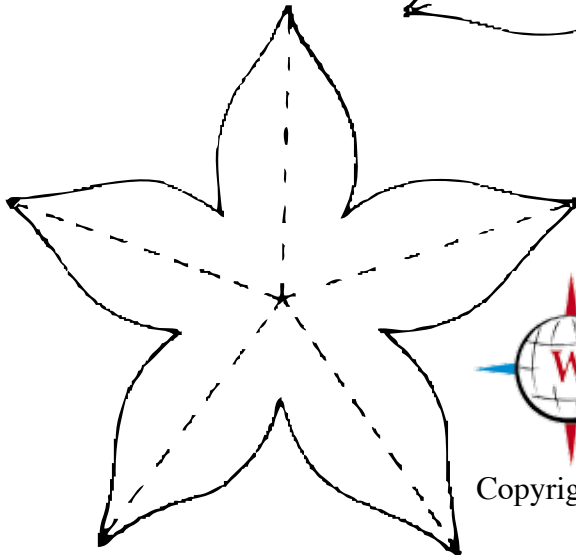

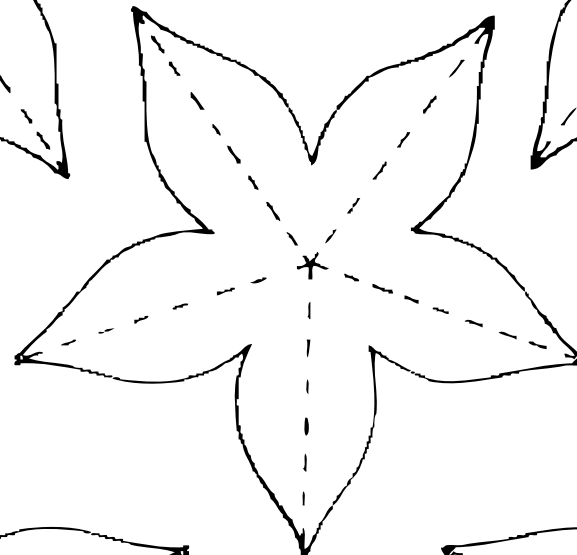

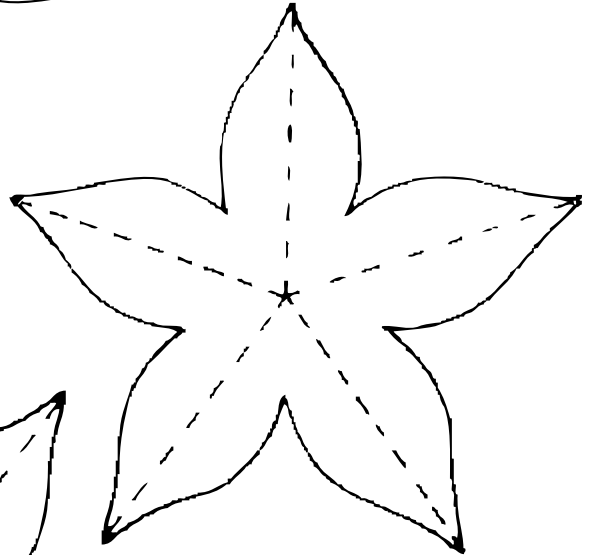

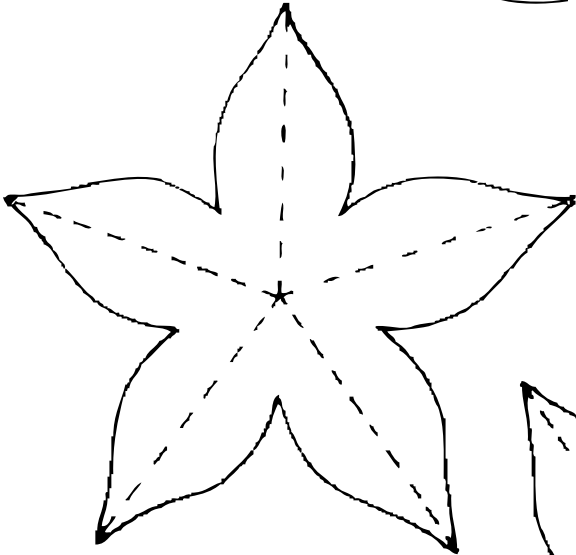

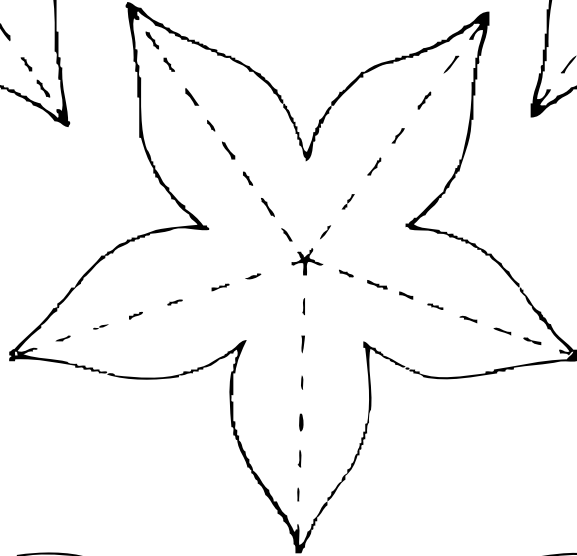

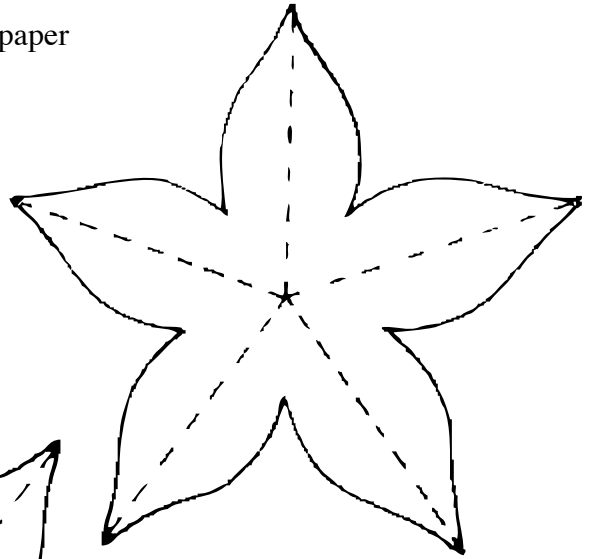

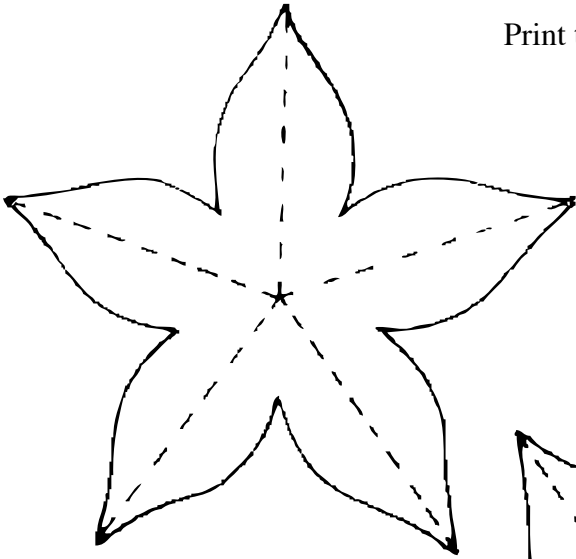

The end result should be a wonderful wreath bouquet that you can hang on your door.

Print this drawing on thick white paper. Then cut the circle out.
